Taxi Pulse

Taxi Pulse is a white-label taxi dispatch software solution to automate and streamline the fleet business of all sizes. This feature-packed solution allows manual and automatic dispatching, fleet management, real-time tracking, and much more. Taxi Pulse has been specially designed to help businesses keep their fleet management process smooth-running. Along with a user-friendly design, this solution allows customizing features according to the business requirements. The solution suite includes iOS and Android apps for passengers and taxi drivers, plus a powerful web panel for dispatchers and admin.
